The Carriers of Humanity

As the world designs more and more barriers,
I see the co-existence in diversity dissever.
Now I wonder where are these mighty carriers,
That vision humanity forever together.

These carriers are known as world citizens,
Who use their influential voices and hands.
They recognize the world beyond its dimensions,
And seek to collaborate the vast lands.

These mighty carriers view the world as a whole,
And not an abundance of places.
They look towards active community roles,
As if to help write another's life of pages.

Now these carriers listen to the needs of many,
Thus, working to unveil the world's true identity.
They see the Earth and all its beauty,
And restore the human in humanity.
